EDUCATION

Btech Information Technology
JC Bose university ymca faridabad
08/2020 - 04/2024   *8.12*

12th
SPS Internationl cbse
04/2019 - 04/2020   *95%*

10th
SPS International cbse
04/2017 - 04/2017   *90.4%*

SKILLS

Algorithms and Data Structures(java)

full stack developer   MERN stack   SQL

programming language- java   git/github   DevOps

Machine Learning(python)   Node.js , react.js , express

DBMS   computer networking

PERSONAL PROJECTS

Tiny URL
- transforms long length urls to short length by generating short unique id , along with url customization to personalize any url as per our choice , along with qr code generator
- technologies used- mongoDb , node.js, express , view engine-ejs
- https://yuvanshu-urls.vercel.app/ ↗

Twitter bot detection
- a machine learning bot classifier used for segregation of bots and humans using pandas and decision trees classifier
- technologies used- numpy , pandas , machine learning decision tree classifier , python , jupyter notebook
- https://github.com/yuvanshugargashya/twitter-bot-detection.git ↗

AI images generator
- generates random images as per discription given by the user
- technologies used- react.js , open-ai api
- https://yuvanshu-ai.vercel.app/ ↗

Real time chatting application
- a complete MERN stack real time application to connect multiple users using user authentication(JWT) at a place to chat independently and create their own chatrooms
- technologies used- react.js , node.js , ejx , web sockets, mongodb
- https://github.com/yuvanshugargashya/mern-chat-app.git ↗
